Duration	11 mins
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

a. By starting from the first element
b. By comparing each element sequentially
c. By using a hash function
d. By dividing the list length by two ✓

Question **2**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It can be applied only if the list is sorted ✓
b. It always starts from the beginning of the list
c. It compares elements sequentially
d. It works on unsorted lists

Question **3**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

a. 89 and 94
b. 90 and 99 ✓
c. 90 and 100
d. 94 and 99

Question **4**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Sorting elements in a list
b. Determining whether an element is present in a list ✓
c. Deleting elements from a list
d. Inserting elements into a list

Question **5**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is somewhere in the middle of the array ✓
b. When the item is the last element in the array
c. Item is the last element in the array or item is not there at all
d. When the item is not the array at all

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Sorting the list before searching
b. Dividing the list in half repeatedly
c. Skipping every second element
d. Checking each element sequentially ✓

Question **7**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Discovering
b. Searching ✓
c. Mining
d. Finding

Question **8**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the entire list
b. In the left sublist ✓
c. In the right sublist
d. At the beginning of the list

Question **9**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Binary ✓
b. Both (1) & (3)
c. Hash
d. Linear

Question **10**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. An error is raised
b. The last element is returned
c. The search is considered unsuccessful ✓
d. The first element is returned

Question **11**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Binary search ✓
b. Linear search
c. Hash search
d. Sequential search

Question **12**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

a. Compare the target element with the middle element in the list
b. Sort the list ✗
c. Divide the list into two equal parts
d. Compare the target element with the first element in the list

Question **13**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Merge search
b. Bubble search
c. Linear search ✓
d. Quick search

Question **14**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Binary search
b. Linear search ✓
c. Hash search
d. Both (1) & (3)

Question **15**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list contains duplicate elements
b. When the list is very small
c. When the list is unsorted
d. When the list is sorted ✓
